D3: US 61638698 A1

D1 discloses a method for collecting interference information. This information is used to assign channels.

D2 describes channel assignment. The carrier to interference ratio is calculated.

D3 relates to channel allocation.

None of the cited documents discloses that a dominant interference ratio is calculated in order to select a channel. Therefore, the cited documents represent the general state of the art.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed method of and apparatuses for channel allocation. Therefore, the claimed invention is not obvious to a person skilled in the art.
